

To Lafayette Township Residents:

As of Monday, April 6th, the Sussex County Health Department has reported one new case of Covid19, a 48 year old female. It is important that we all do what we can to halt the progression of this virus. Please limit your trips to public places and practice social distancing whenever possible. Another defense against the Corona Virus is washing hands frequently in bacterial soap. Any items brought into your home (groceries, deliveries, etc.) should be thoroughly wiped with disinfectant wipes. For those infected with the virus, our thoughts and prayers are with you for a quick and complete recovery. You are not alone; we are all in this together and will strive to conquer this disease.

Alan R. Henderson, Mayor & Township Committee
