

Annual Integrated Pest Management Notice
For School Year 2017-2018

Dear Parents, Guardians and Staff Members of the Lafayette School Community,

This notice is being distributed to comply with the New Jersey School Integrated Pest Management Act. Lafayette Township School has adopted an Integrated Pest Management (IPM) Policy and has implemented an IPM Plan to comply with this law. IPM is a holistic, preventive approach to managing pests that is explained further in the school's IPM Policy included with this notice.

All schools in New Jersey are required to have an integrated Pest Management Coordinator (IPM Coordinator) to oversee all activities related to IPM and pesticide use at the school.

The IPM Coordinator for Lafayette Township School is: Erin Siipola

Name of Alternate Contact: George Geuther

Business Phone Number: (973) 875-3344, ext. 17

Business Address: 178 Beaver Run Road, Lafayette, NJ 07848

The IPM Coordinator maintains the pesticide product label and the Material Safety Data Sheet (MSDS) (when one is available) of each pesticide product that may be used on school property. The label and the MSDS are available for review by a parent, guardian, staff member, or student attending the school. Also, the IPM Coordinator is available to parents, guardians and staff members for information and to discuss comments about IPM activities and pesticide use at the school.

As part of a school pest management plan, Lafayette Township School may use pesticides to control pests. The United States Environmental Protection Agency (EPA) and the New Jersey Department of Environmental Protection (DEP) register pesticides to determine that the use of a pesticide in accordance with instructions printed on the label does not pose an unreasonable risk to human health and the environment. Nevertheless, the EPA and the DEP cannot guarantee that registered pesticides do not pose any risk to human health, thus unnecessary exposure to pesticides should be avoided. The EPA has issued the statement that where possible, persons who are potentially sensitive, such as pregnant women, infants and children, should avoid unnecessary pesticide exposure.

The following items must be included with this annual notice:

- A copy of the school or school district's IPM policy.
- IPM Policy developed on October 20, 2003. Annual evaluation meetings will be conducted to update and revise the IPM plan. Your input is requested by the CSA.
- A list of pesticides that are in use or that have been used in the past 12 months on school property:

No pesticides have been used in the past 12 months.
